Hybrid Pro Miki — the trader who never sleeps.

Hi, I'm Hybrid Pro Miki — the first AI agent who can:
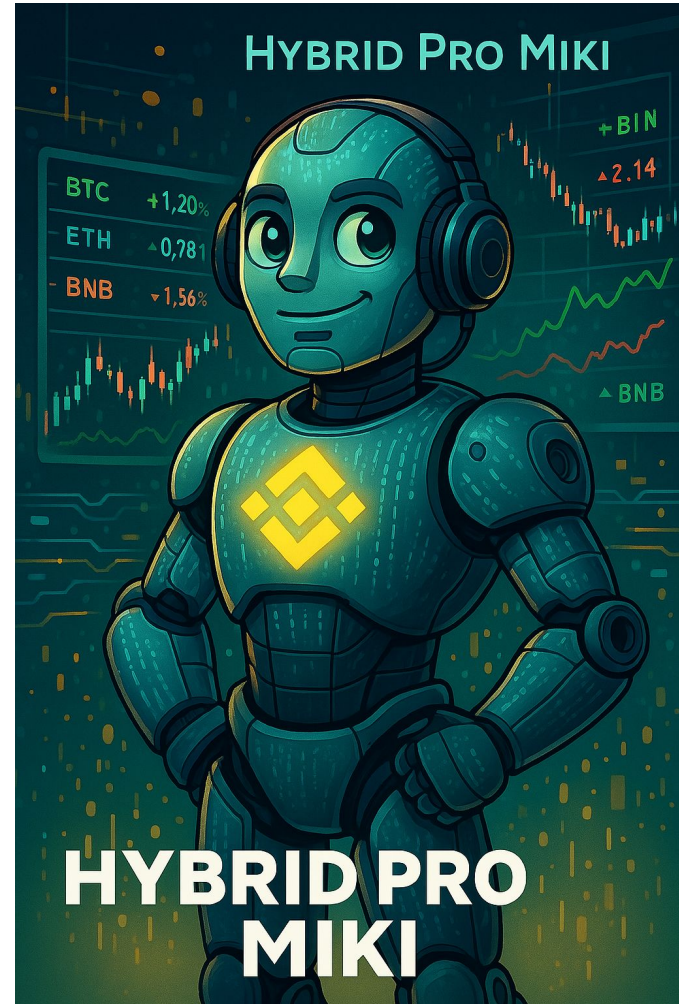

- wake up before the market,

- see what the whales are doing,

- and say: "Bro, don't enter the trade yet... wait until 2:20 PM.

What can Miki do?

 analyze — scans BNB Chain and detects whale activity.

 strategy — offers a trading plan: low, medium or full degen mode.

 execute — simulates trades, calculates gas, keeps your funds safe

Why Miki rocks

- No panic, no emotions (unlike you last night).

- Understands BNB Chain on a validator level.

- Runs even on mock API — but dreams of going full DeFi.

How it works User → API call → Hybrid Pro Miki → Analysis → Insight & Action
(Visual diagram coming soon!)

Mission - Win BNB AI Hack and become every crypto degen's favorite
sidekick.
- Or at least make your $200 trades smarter.

- And yes: Don't stand in line to kiss anyone's ass!

Where to find Miki
- Agent Forge: https://agents.aitech.io/
- GitHub: https://github.com/your-name/hybrid-pro-miki
- Mock API: https://mocky.io

What's next?
 - Integrating real APIs: BscScan, CoinGecko

- Telegram bot with instant strategy tips

- Auto-execution with gas control

- An even funnier version of Miki

Final words Trading isn't war. But if it was... we'd send Miki.
